**FRAISA** – Your technology partner for sustainable production

## **FRAISA ReTool®** – Industrial tool reconditioning with a performance guarantee

As a FRAISA customer you know: With our tool reconditioning program **FRAISA ReTool®** your tool will regain its original performance – we guarantee it!

But do you also know about our numerous **additional services** that can be tailored to your needs?

### **The FRAISA performance guarantee**

We guarantee 100 %...

- ...compliance with your specifications, defined in the **FRAISA ReTool® Specification (RTS)**
- ...achieving the performance of the new tool
- ...the service life of the new tool

## FRAISA ReTool® additional services

### Basic services Always included

- High-precision reconditioning of solid carbide square, ball-end, and corner radius cutters with adherence to the radius tolerances of the new tool
- Performance guarantee for all FRAISA high performance milling tools and carbide drills
- Repeatability: Through the use of state-of-the-art CNC grinding and measuring machines, we achieve identical geometries and surface qualities
- Labels and barcodes for FRAISA ToolCare® customers
- Consideration of individual customer requirements through the **FRAISA ReTool®** Specification (RTS)
- Detailed information for tools that can no longer be reprocessed
- FRAISA Full-Service Logistics: Fast, safe and cost-effective handling in reusable boxes and individual packaging

### Optional services On request and without additional cost

- Grinding of milling tools to desired diameter (grinding steps)
- Consideration of desired minimum cutting edge lengths of milling tools and carbide drills
- Consideration of desired neck lengths ( $l_3$ ) for milling tools
- Marking by means of one notch per preparation at the end of the shaft
- Labels and barcodes with your defined article numbers
- Labels with specified tool-specific information
- Recycling of tools that can no longer be reprocessed by FRAISA ReToolBlue
- Evaluation of your tools for process optimization

### Individual services On request with additional cost

- Laser marking on the tool shank according to individual customer specifications
- Grinding "Weldon" clamping surface on the shaft
- Tool measurement with package marking (label)
- Measurement reports for reconditioned tools
