The next step in sustainability: **FRAISA ReTool®** packaging cores

100%
recycled

With the sustainable **FRAISA ReTool®** service, FRAISA is taking responsibility for the careful use of resources.

We are now taking the next step towards a sustainable future: **FRAISA ReTool®** packaging cores are gradually being converted to a material that is 100% recycled.

With this changeover, we are helping to further improve our carbon footprint and also support our customers in meeting their sustainability targets.

The **FRAISA ReTool®** advantages at a glance:

FRAISA performance guarantee

100% of the cutting performance of a new tool

Maximum preservation of substance

Resource conservation

Convenient processes

About 60% cost savings with **FRAISA ReTool®**
